Numerical Optimization

This is a book for people interested in solving optimization problems. Because of the wide (and growing) use of optimization in science, engineering, economics, and industry, it is essential for students and practitioners alike to develop an understanding of optimization algorithms ...

Numerical Optimization — Lecture notes

These are notes for a one-semester graduate course on numerical optimisation given by Prof. Miguel A. Carreira-Perpin˜an at the University of California, Merced. The notes are largely based on the book “Numerical Optimization” by Jorge Nocedal and Stephen J. Wright (Springer, 2nd ed., 2006), with some additions.

Numerical Optimization by Jorge Nocedal and Stephen J. Wright. ... in the conjugate-direction update Equation 6 and that is valid for nonlinear optimization. ... for the solution to $Ax = b$ when A is the $n \times n$ Hilbert matrix (generated in MATLAB using the built-in function `hilb.m`) and b is a vector of all ones and starting with an initial guess ...

Second Edition

Every year optimization algorithms are being called on to handle problems that are much larger and complex than in the past. Accordingly, the book emphasizes large-scale optimization techniques, such as interior-point methods, inexact Newton methods, limited-memory methods, and the role of partially separable functions and automatic ...

Numerical Optimization

Numerical Optimization presents a comprehensive and up-to-date description of the most effective methods in continuous optimization. It responds to the growing interest in optimization in engineering, science, and business by focusing on the methods that are best suited to practical problems. For this new edition the book has been thoroughly updated throughout.
